

Technical specification

Flexbitumen 3,5kg/m²

Description A heavy layer material used for anti-vibration mounting and to increase weight of airborne sound insulation. Good flexibility.

Properties	Unit	Value	Test method
Thickness	Mm	1,78 ± 0,18	
Density	Kg/m ²	3,5 ± 0,18	
Damping	dB/s	> = 13	ME SAE
Resistance to Thermal Shock	°C	- 20	ME 1313
Combustibility	mm/mm	> = 75	MVSS 302
Temperature resistance	°C	+5 / +70
